- Normalized Impact higher than CSIC average
- Normalized Impact higher than Spanish average
- Normalized Impact lower than Spanish average

**AS:** Agricultural Sciences, **BB:** Biology and Biomedicine, **CST:** Chemical Sciences and Technology, **FST:** Food Sciences and Technology, **H&SS:** Humanities and Social Sciences, **MST:** Materials Sciences and Technology, **NR:** Natural Resources, **PST:** Physical Sciences and Technology

\* International Collaboration, Normalized Impact and Publication 1st. Quartil values corresponding to institutions presenting low scientific outputs (i.e. lower than 100) must be studied carefully, because such small figures can lead to trivial conclusions with extremely low statistical significance.

**Disclaimer notice:**

This ranking IS NOT A LEAGUE TABLE. The ranking parameter – the scientific output of institutions-- should be understood as a default rank, not as our ranking proposal. The only goal of this report is characterizing research outcomes in order to provide useful scientometric information to the institutions, policymakers and research managers so they are able to analyze, evaluate and improve their research results. If someone use this report to rank institutions or to build a league table with any purpose, will do it under his/her own responsibility.
